3. Claims 26-34 and 55-72 are allowed.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art, U.S. Pub. No. 2002/0059203 A1 to Witkowski et al., discloses a method for performing spreadsheet like operations in a database system, and both spreadsheets and databases are multi-dimensional electronic data tables having rows and columns, i.e., first and second dimensions (par. 0018). Witkowski discloses performing recursive calculations on the spreadsheet cells using spreadsheet clauses, explained in detail at par. 0127-0139. Witkowski discloses defining the spreadsheet template at 0185-0190, and storing the template at par. 0191-0197.

Hurst, et al., "Layout and Language: Preliminary investigations in recognizing the structure of tables", Proceedings of the Fourth International Conference on Document Analysis and Recognition, August 1997, Vol. 2, p. 1043-1047, is relied upon to teach linking ordered table cells to recursive scalable template instances (p. 1044; Sect. 3.2), where the cells have different sizes within the table rows and columns, for example different string length of a table area, or empty cells (p. 1045, Sect. 3.3); Hurst teaches classifying layout patterns in the tables (p. 1043, Sect. 2.1).

Independent claims 26, 55, and 64 are allowable over the prior art because neither Witkowski nor Hurst disclose the following limitations claimed in independent claims 26, 55, and 64,

...wherein the RST comprises a header part and/or a footer part, the header part and/or the footer part of the RST comprising at least one recursive meta-elements (RME), wherein each RME comprises at least one ST, and

generating a header part and/or a footer part of the RSTI, wherein the header part and/or the footer part of the RSTI corresponds to the header part and/or the footer part of the RST, wherein the header part and/or the footer part of the RSTI comprises at least one REI of the plurality of REIs of the RSTI.

While Witkowski discloses recursive spreadsheets, Witkowski does not disclose generating a header or footer. Hurst discloses linking table cells to recursive scalable template instances, but does not teach generating a header or footer. A search of the prior art did not result in any references which disclosed the combination of features claimed in independent claims 26, 55, and 64.

Further, it would not have been obvious to one of ordinary skill in the art at the time of the invention to have combined Witkowski and Hurst to arrive at the invention claimed in claims 26, 55, and 64, since neither reference disclosed or suggested all of the claimed features as set forth above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
